

CHAT-STYLE EMAIL · A CONCEPT PREVIEW

What if email felt as simple as **a chat?**

Write the way you chat. Sending and replies are still to be built.

CONCEPT + DRAFT PREVIEW

NOT A LIVE EMAIL SERVICE

SOUND FAMILIAR?

You know what to say. The format makes you pause.

A quick client note turns into a formal job. Open the form. Pick the words. Find the thread. Check who gets it. A chat-like view could make starting easier.

EXAMPLE DRAWING — NOT REAL DATA

WHAT YOU MEAN

Quick update: the first draft is ready.

becomes

One short thought.

Easy to say
out loud.

WHAT EMAIL ASKS FOR

The diagram shows a web browser window with an email form. The form has four input fields: 'To', 'Cc', 'Subject', and a large text area for the message body. Below the text area is the text 'Kind regards,' and a 'Send' button. Four numbered steps are indicated by dashed lines pointing to the form: 1. Open the form (points to the browser window), 2. Pick the words (points to the message body text area), 3. Find the thread (points to the 'Subject' field), and 4. Check who gets it (points to the 'Cc' field).

1 Open the form

4 Check who gets it

3 Find the thread

2 Pick the words

01

The format feels heavier than the message.

02

Your thought is in one place. The email thread is in another.

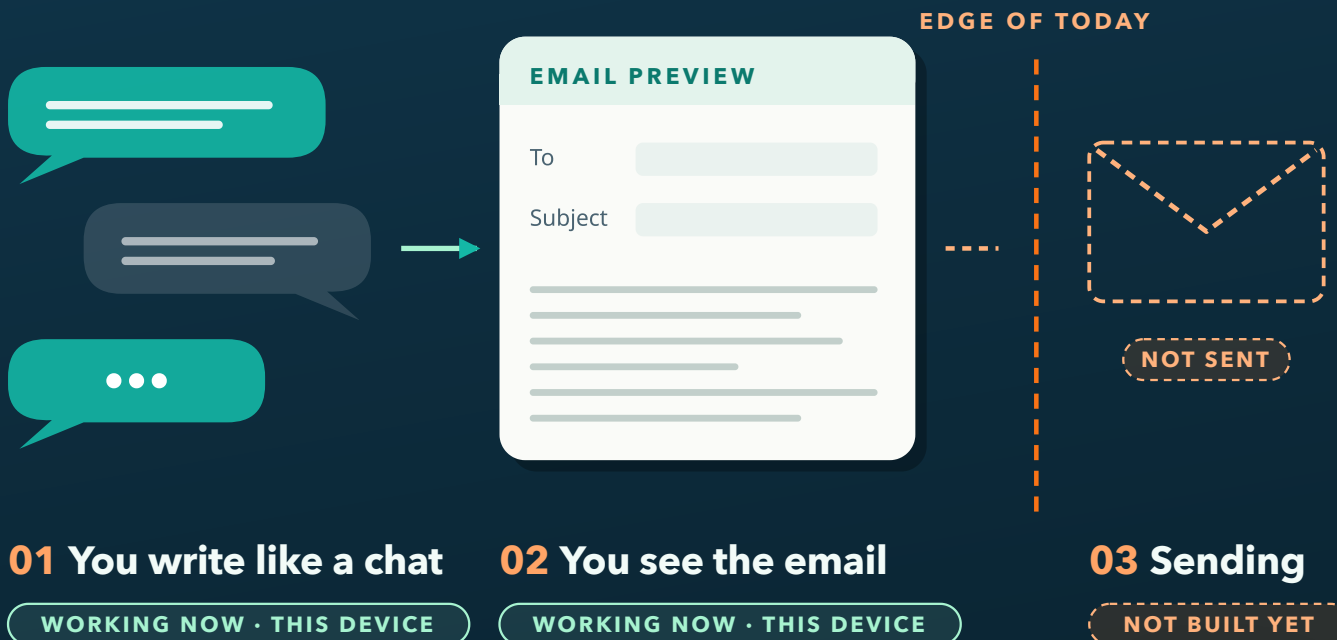

What is missing is how the steps fit together →

MEET MAILCIRCLE

Start with a chat. See the email.

MailCircle is an idea for chat-style email, taken from Business OS. Today you can write chat-style drafts, fill in an email form, preview it and add quick replies. Nothing is sent. No mailbox is linked.

DRAWING — NOT A REAL SCREEN

**CONCEPT PREVIEW – NOT A LIVE EMAIL SERVICE**

Drafts stay on this device. It does not send chats as email, link your mailbox or bring replies back.

See how it works in four steps →

HOW IT WORKS

Four steps. One clear **next step**.

Saving drafts works now, on this device. Sending, mailbox links and reply matching are not built.

1

Draft

Try the chat-style layout.

WORKING NOW · THIS DEVICE

2

Preview

Check who it goes to, the subject and the message.

WORKING NOW · THIS DEVICE

3

Reuse

Add a quick reply you saved before.

WORKING NOW · THIS DEVICE

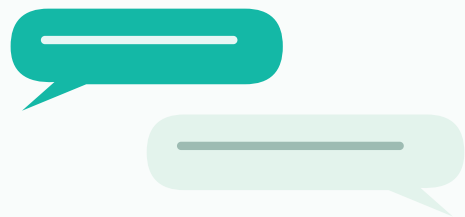

4

Define

Plan the missing send-and-reply steps.

WHAT YOU CAN TRY TODAY

The draft is real.
The delivery is not connected.

The form shows how your email will look and saves a draft on this device. Send is turned off. Real screens still say Business OS. MailCircle is not its own product yet.

NOT SENT

Send

TURNED OFF

See it first

The shape of the email, before anything else.

Saved here only

Drafts stay in this browser.

Send is off

No email is sent.

A drawing based on the Business OS email preview. It is not a screenshot.

Try it against a job you know →

WHERE IT COULD HELP

Start with a job you already know.

Made-up examples only. Not customer stories or measured results.

EXAMPLE 01**A client update****SITUATION**

A freelancer needs a short note.

**ACTION**

Use the email form with sample text.

**RESULT**

See how writing feels. Nothing is sent.

DRAFT ONLY • NOT SENT

EXAMPLE 02**A common question****SITUATION**

A business types the same words often.

**ACTION**

Add a saved quick reply.

**RESULT**

A ready start for the draft.

DRAFT ONLY • NOT SENT

EXAMPLE 03**Looking over chats****SITUATION**

A team wants to see shared questions.

**ACTION**

Look through thread and inbox screens.

**RESULT**

Judge the idea. Live team sharing is not built.

SCREENS ONLY

Every example stops
before sending.
Nothing is delivered.

The difference is in how the parts connect →

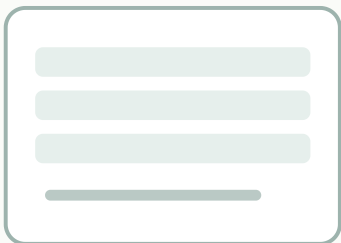

A FAIR COMPARISON

Compare the way you work.

Keep it fair.

Your current tools may already fit. Before you switch, check how the steps connect and what works today.

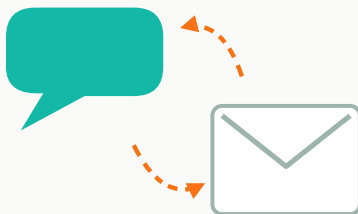

A normal email form

WHAT CAN GET IN THE WAY

Writing can feel formal for some people.

MAILCIRCLE TODAY

Chat-style drafts you can try.

[TRY IT NOW](#)

A chat app plus email

WHAT CAN GET IN THE WAY

Your words move between two places.

MAILCIRCLE TODAY

The link from chat to email is not finished.

[NOT BUILT](#)

A live shared inbox

WHAT CAN GET IN THE WAY

These tools already handle real replies.

MAILCIRCLE TODAY

Today's draft screens cannot do that.

[NOT THE SAME](#)

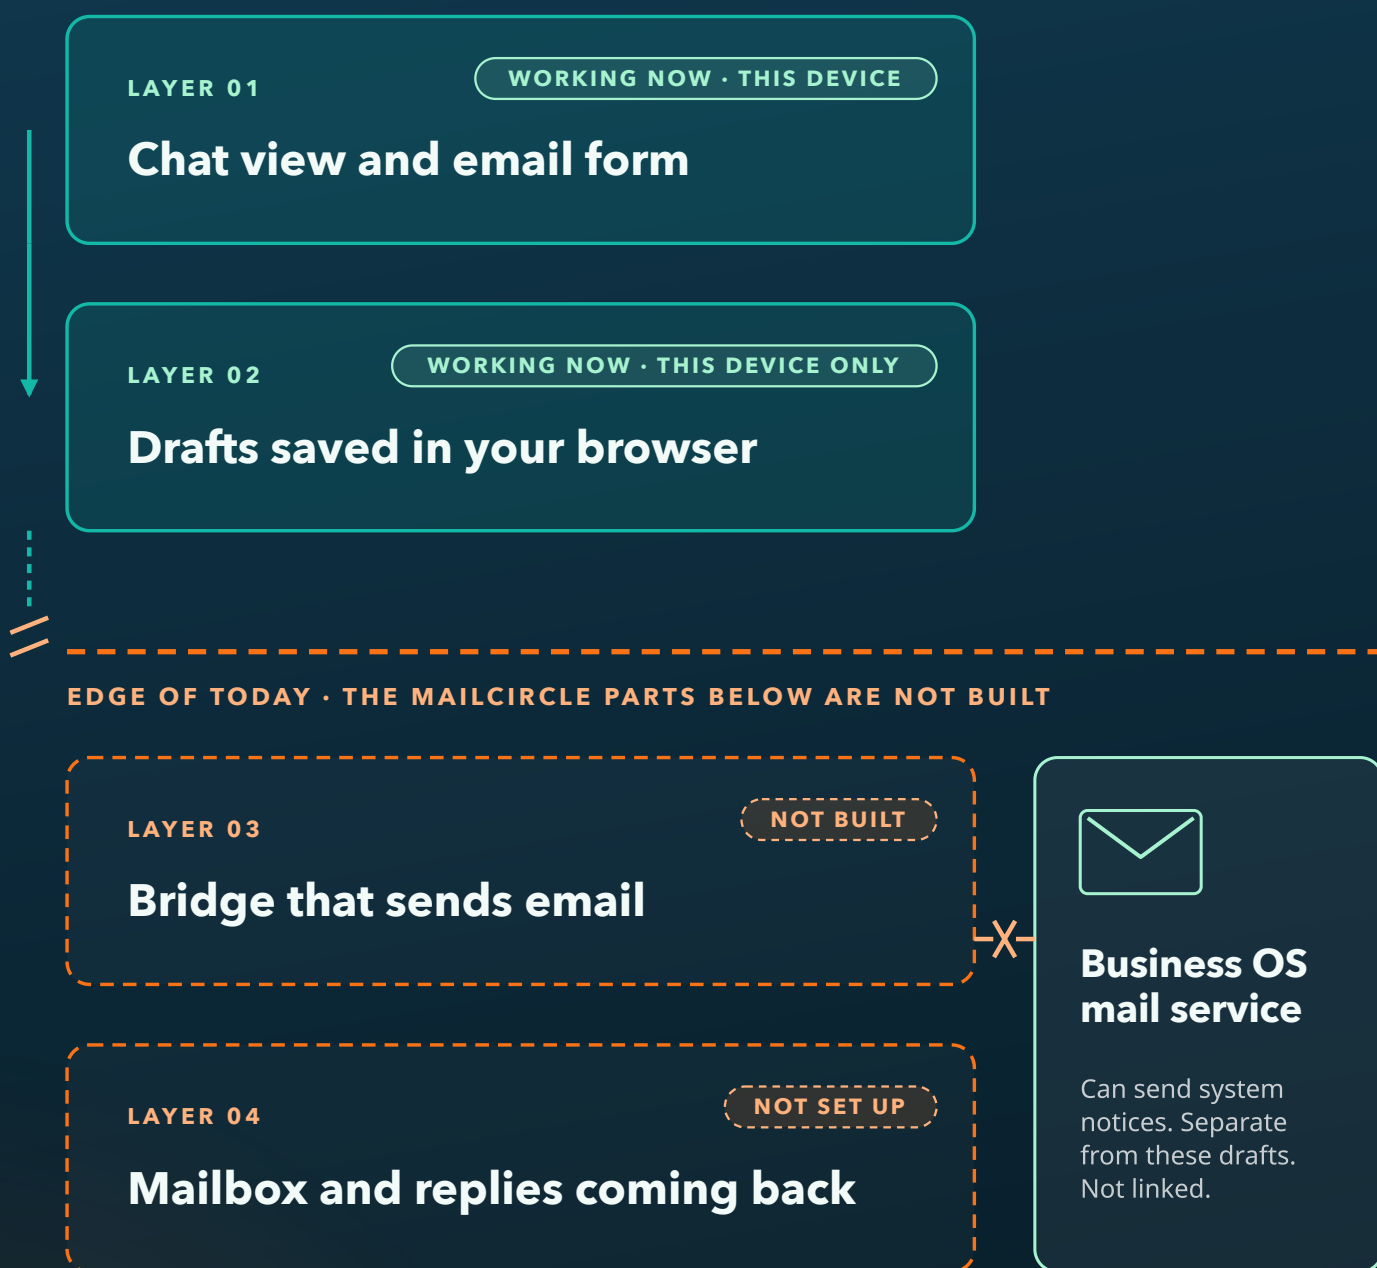

Broad kinds of tools only. No product names. No scores.

Look under the surface, without the jargon →

HOW IT FITS TOGETHER

One simple picture. Clear edges.

Business OS has a separate mail service for system notices. It is not linked to these drafts.

Read from top to bottom. Solid line: works today. Dashed line: not built. No arrow crosses the edge.

The proof should be as clear as the picture →

WHAT HAS BEEN TESTED

Two separate parts. No made-up link.

6

email tests passed, for the separate Business OS mail service.

Six email tests passed on a test computer, with a practice inbox.

They check how Business OS sends its own mail, with its rules and retries.

They do not check MailCircle sending, or that real inboxes accept the mail.

**FOUNDATION 01****MailCircle drafts**

On your device. Not part of these tests.

**NO LINK**

not tested together

6

FOUNDATION 02**Business OS mail service**

6 email tests passed on a test setup.

TEST RESULTS ONLY

No customer results, large-scale speed or outside certificate is claimed.

Proof is where trying it out starts, not where it ends →

BEFORE REAL USE

"Draft" and "sent" must never look alike.

A real product must keep recipients and threads, store messages safely, track what left and bring replies back. That is still to be built. For now, test with made-up text.

**1**

What works today, and what does it need?

2

Who can see the data?
Who looks after what?

3

What is the written plan, the cost and the test for "done"?

NOT IN THIS PREVIEW

Browser drafts are not a safe or shared mailbox. Gmail, Outlook, attachments and AI rewriting (a computer helper that rewords text) are not in this preview.

Bring one real question to the next talk →

YOUR NEXT STEP

Bring one message you write every week.

Try the draft screens. Then tell us what a safe send-and-reply path must keep for you.

Let's talk about your email steps

Reply to the person who shared this brochure. Name the email task you want to explore.

Your weekly message
